

RAD-AID began in 2008 to answer this need for more radiology and imaging technology in the resource-limited regions and communities of the world. The organization began as a few people at Johns Hopkins, and has grown to include more than 6100 volunteers from 100 countries, 45,000 web visitors per year, 53 university-based chapter organizations, on-site programs in 20 countries, and an [annual conference](#) on global health radiology.

RAD-AID's mission is to increase and improve radiology resources in the developing and impoverished countries of the world. Radiology is a part of nearly every segment of health care, including pediatrics, obstetrics, medicine and surgery, making the absence of radiology a critical piece of global health disparity.

RAD-AID International and the [Canadian Association of Medical Radiation Technologists](#) (CAMRT) are pleased to collaborate on a program designed to give medical radiation technologists from Canada the opportunity to contribute to the health care needs of the developing world. Recipients of this award will join RAD-AID's project teams in international initiatives designed to improve access to quality medical imaging for populations in need. For more information on RAD-AID follow the link <https://www.rad-aid.org/programs/rad-aid-camrt-fellowship/> or the Dalhousie Chapter or RAD-AID at https://www.dal.ca/faculty/health/news-events/news/2018/02/13/rad_aid_dal_chapter_brings_radiological_technology_to_underserved_communities.html

RAD-AID and CAMRT are taking applications for this program now! Please consider applying for this new opportunity to use your skills in service to developing regions of the world. The experience of working in a multidisciplinary team for radiology around the world can be personally and professionally fulfilling as you learn about other cultures and health care systems to use your talents for improving global health. Any questions about this program can be emailed to RAD-AID's Director of Technologist Programming, Tiffani Walker at twalker@rad-aid.org.
